

DESCRIPTION

LiteFoot is an insulated concrete footing form for frost protected shallow foundations. It is an engineered and approved method that meets today's building codes (meets or exceeds R403.3 - IRC2015). LiteFoot is used in Northern regions across the US and endures sub-zero temperatures without failure.

Typical Residential Footing

Single - 24" wide x 8' long
 Pallet qty - 24
 Concrete Footing - 18" x 8"

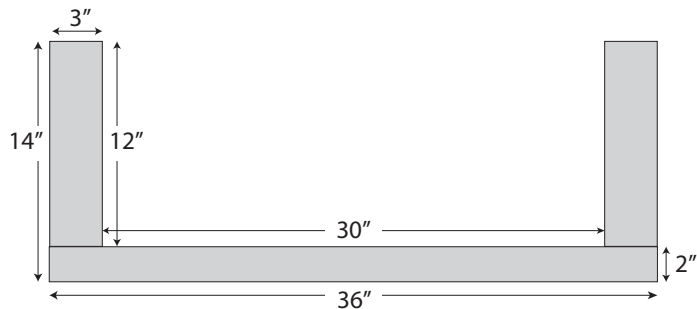

Residential Specifications

PART # 4245

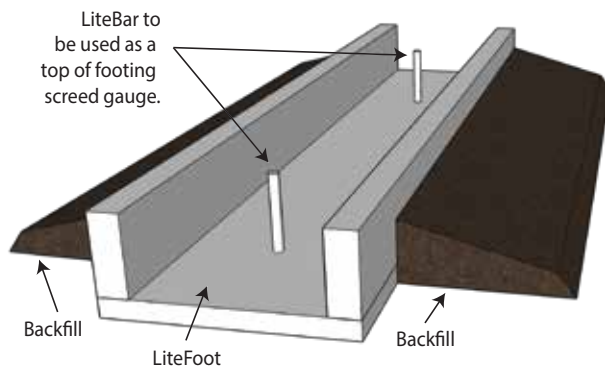

Typical Commercial Footing

Single - 36" wide x 8' long
 Pallet qty - 12
 Concrete Footing - 30" x 12"

Commercial Specifications

PART # 4246

Typical Bracing Option

Cutaway with ICF Wall Interior/Exterior
